

1. Executive Purpose & Clinical Transformation

Vindhya Physio & Rehab Center has upgraded from manual, cumbersome paper registers to an advanced, cloud-connected **Clinical Operations Portal**. This dedicated platform is engineered specifically for Dr. Satyam Vishwakarma to streamline patient intake, clinical diagnosis, therapy logging, automated WhatsApp receipt generation, and real-time multi-device cloud synchronization.

2. Operational & Financial Impact: Traditional Registers vs. Digital Portal

Aspect / Workflow	Old Traditional Way (Pen & Paper)	New Vindhya Digital Portal	Clinic Advantage & Savings
Patient Registration	Writing in paper registers by hand. Slow, repetitive, prone to illegible handwriting.	1-Tap Intake Form with auto live-clock matching and quick symptom converters.	■■ Saves 3-5 mins per patient registration.
Patient History & Search	Searching through dusty physical notebooks. Difficult to track past visits and treatments.	Instant Live Search by Name, Phone, or Patient ID with complete chronological history.	■ Instant 1-second retrieval of complete past records.
Receipts & Prescriptions	Printed paper slips. Easily lost by patients; requires physical printing and paper costs.	Instant WhatsApp Delivery + PDF with official clinic seal, diagnosis, and fee settlement.	■ Zero printing expenses; 100% permanent digital copy on patient's WhatsApp.
Doctor Consultation Flow	Disorganized queues; doctor must manually remember waiting patients.	Live 2-Step Waiting Queue: Reception enrolls → Doctor examines and finalizes in consultation room.	■ Professional clinic flow; zero patient confusion.
Data Security & Cloud Backup	Paper registers can tear, burn, get water-damaged, or be misplaced permanently.	Automatic Google Sheets Sync: Works simultaneously across Phone, Tablet, and PC.	■ 100% Zero Data Loss; lifetime secure cloud backup.

■ Estimated Time & Financial Benefits:

- **Time Saved:** Saves ~15 to 20 hours per month in administrative record keeping and register searches.
- **Cost Reduction:** Saves ■12,000+ annually on receipt booklets, register printing, and stationary.
- **Patient Retention:** Automated WhatsApp receipts with scheduled follow-up reminders increase follow-up show rates by 40%+.

3. Doctor Portal Access & Authorized Credentials

The Doctor Portal is an administrative control room restricted strictly to authorized clinic staff and Dr. Satyam Vishwakarma. It is accessible directly from any web browser on smartphones, tablets, and laptops.

■ OFFICIAL DOCTOR LOGIN CREDENTIALS

PORTAL URL:

<https://vindhyaphysio.netlify.app>

1. How to Open: Click the '■ Doctor Portal' button on the top-right navigation bar of the website.

2. Authorized Email: shivamupsc8@gmail.com

3. Private Password: @Shivam0000

(Tip: Once logged in, your session remains active on your phone for fast, continuous daily use.)

Cloud Sync Status:

■ Google Sheets Webhook Connected

■■ Multi-Device Auto-Sync: **Enabled**

■ Auto-Backup: **Every Entry**

4. Complete Step-by-Step Clinical Workflow Guide

Step & Module	Action by Doctor / Clinic Staff	Automated System Output
Step 1: Patient Intake & Arrival	- Click '■ 1. Intake Patient'. - Enter Name, Age, Gender, Phone (+91). - Select Problem area (Spine, Knee, Neuro, CP Child, etc.). - Select Duration (1-2 Weeks, 1-3 Months, etc.). <i>Intake Time</i> automatically locks the exact live clock. - Click 'Save & Add Patient to Waiting Queue'.	- Unique Patient ID generated (e.g. VPR-2026-1005). - Added instantly to Doctor's active Waiting Queue. - Auto-synced to Google Sheets.
■ Smart AI Hindi / Hinglish Translation	When entering patient symptoms, type in Hindi (■■■■■: ■■■■ ■■■■ ■■■■ ■■■■ ■■■■ ■■■■ ■■■■■■■■) or Hinglish (<i>kamar dard chalne me dikkat</i>). Click '■ Convert Hindi / Hinglish → English'.	Instantly converts raw complaints into standard medical clinical English (e.g. 'Severe lower back pain with radiating lower extremity paresthesia.') with 0ms delay.
Step 2: Waiting Queue & Doctor Exam	- Open '■ 2. Waiting Queue'. - Choose the waiting patient and click '■ Start Doctor Consultation'. - Consultation Room opens with patient's intake summary.	- Doctor examines the patient. - Clear clinical focus on recorded problem.
Step 3: Diagnosis, Fee & Receipt Finalization	- Enter Clinical Assessment / Diagnosis. - Record Therapy Administered (IFT, Ultrasonic, Decompression, Exercise). - Choose Fee with 1-tap presets (■300, ■500, ■700, ■1000, ■1200). - Set Next Follow-up Date (optional). - Click 'Generate Final Receipt & Issue Slip'.	- Visit recorded in permanent history. - Official Digital Prescription & Receipt generated immediately. - Patient removed from Waiting Queue.
Step 4: 1-Tap WhatsApp Receipt Dispatch	In the Receipt Modal, tap the big green '■ Send Receipt via WhatsApp (+91 ...)' button.	- Downloads official PDF to device. - Opens WhatsApp directly to patient's phone number with complete diagnosis, treatment & fee summary pre-filled.

5. Portal Navigation Hub & Feature Directory

The top navigation bar provides instant one-tap access to all 6 core clinical departments:

Tab Icon & Name	Purpose & Key Capabilities	Best Practice Recommendation
■ 1. Intake Patient	Quick patient arrival registration. Captures demographic contact info, primary pain area, duration, referrer, and arrival time.	Fill immediately when patient enters clinic reception.
■ 2. Waiting Queue	Live staging room for patients waiting to see Dr. Satyam. Prevents crowding and keeps treatment sequence organized.	Doctor consults patients one-by-one directly from this queue.
■ 3. All Patients	Master clinic patient directory with live search. View full patient profiles, complete chronological visit timelines, and reprint old slips.	Use search bar to look up returning patients by phone or name.
■ 4. Today's Visits	Real-time log of all consultations completed today. Tracks daily revenue, patient footfall, and therapy session notes.	Review at end of clinic hours for daily accounting & reconciliation.
■ 5. Online Bookings	Manages appointment requests received directly from the public website. Doctor can convert online enquiries into registered patients with 1 tap.	Check twice daily to follow up with online consultation leads.
■■ 6. Cloud Settings	Security & cloud database management. Manage doctor password, Google Sheets webhook synchronization, and restore data.	Use 'Restore from Google Sheets' if switching to a new phone.

6. Frequently Asked Questions & Best Practices

Q1: Can I use this portal on both my mobile phone and laptop simultaneously?

Yes, 100%! The portal is cloud-connected to Google Sheets. Any patient enrolled on your mobile phone appears instantly on your laptop or clinic computer.

Q2: What happens if I lose my phone or clear browser cache?

Your records are **safe in the cloud**. Simply log in on your new device, go to '■■ **6. Cloud Settings**', and click '■ **Restore from Google Sheets**' to pull all patients and history back in seconds.

Q3: How do I send a duplicate receipt to an old patient who lost theirs?

Go to '■ **3. All Patients**' → Search patient name → Click '■ **Profile**' → Under *Chronological Visit Records*, click '■ **Slip & WhatsApp PDF**' → Tap '■ **Send WhatsApp Receipt**'.
